1. ✔ What character do you add to the "+" or "*" to indicate that the match is to be done in a non-greedy manner?
   - ○ ^
   - ○ **
   - ○ \g
   - ○ $
   - ○ ++
   - ◉ ?

2. ✔ What will the '$' regular expression match?
   - ◉ The end of a line
   - ○ A new line at the end of a line
   - ○ The beginning of a line
   - ○ An empty line
   - ○ A dollar sign

3. ✔ What would the following mean in a regular expression? [a-z0-9]
   - ○ Match any number of lowercase letters followed by any number of digits
   - ○ Match anything but a lowercase letter or digit
   - ○ Match any text that is surrounded by square braces
   - ○ Match an entire line as long as it is lowercase letters or digits
   - ◉ Match a lowercase letter or a digit

4. ✔ What is the type of the return value of the re.findall() method?
   - ○ A string
   - ○ A single character
   - ○ A boolean
   - ○ An integer
   - ◉ A list of strings

5. ✔ What is the "wild card" character in a regular expression (i.e., the character that matches any character)?
   - ○ *
   - ○ ?
   - ○ $
   - ○ ^
   - ○ +
   - ◉ .

6. ✔ What is the difference between the "+" and "*" character in regular expressions?
   - ○ The "+" matches upper case characters and the "*" matches lowercase characters
   - ○ The "+" indicates "start of extraction" and the "*" indicates the "end of extraction"
   - ○ The "+" matches the beginning of a line and the "*" matches the end of a line
   - ○ The "+" matches the actual plus character and the "*" matches any character
   - ◉ The "+" matches at least one character and the "*" matches zero or more characters

7. ✔ What does the "[0-9]+" match in a regular expression?
   - ○ Zero or more digits
   - ○ Any mathematical expression
   - ○ Several digits followed by a plus sign
   - ○ Any number of digits at the beginning of a line
   - ◉ One or more digits

8. ✔ What does the following Python sequence print out?

```
x = 'From: Using the : character'
y = re.findall('^F.+:', x)
print(y)
```

   - ○ ['From:']
   - ○ ^F.+:
   - ○ From:
   - ○ :
   - ◉ ['From: Using the :']
